The new Online Energy Directory is the most comprehensive oil & gas exploration and production data source available presented in the most user friendly environment known. The directory contains more listings than ever before, not only of oil & gas exploration and production operating companies across the world, but also of all the support sectors in the industry, from the largest worldwide engineer/contractors to local service and supply companies in every area.

Other valuable International E&P Industry information includes:

- Oil production and gas production volumes, as well as total reserves.
- Financial information reflecting public/private status, assets, revenue, income and expenditures when available.
- Operating locations in both onshore and offshore areas.
- Division, field, and maintenance offices.
- International firms that support the Worldwide Exploration & Production Industry including 2,000 companies in the Equipment Manufacturers and Suppliers section and 2,600 companies in the Engineers, Contractors and Service Companies section.
- Buyer's Guide categories reflect specific products and services provided by selected companies in both sections.
- Support company details - descriptions of goods and services provided, industry segments served, and additional information to facilitate business.
- Links provided to 4,800 websites and 36,000 email addresses.
- 800 cross reference listings to help you track down company name changes, new and past mergers and acquisitions.
- Priced at \$375, the International Exploration and Production Online Energy Directory provides the best value available today.

Let the AUTHORITY in the International Exploration and Production Industry provide you with all the business contact information that you'll ever need!
